

## CONTENTS

Effects of Secondary Torsion in Curved Prestressed Concrete Bridges Built by Incremental Launching Method <i>Marcello Arici, Michele Fabio Granata</i>	1-21
On the Effect of Lightening the Solid Fill in an Ancient Masonry Bridge <i>Alessandro Baratta, Ileana Corbi, Ottavia Corbi, Francesca Tropeano</i>	23-37
Influence of Soil-Structure Interaction Modeling on the Response of Seismically Isolated Bridges <i>Spyridoula Papathanasiou, Panos Tsopelas, Evgenia Prapa, Alper Ucak</i>	39-70
Structural Analysis of Cable-Stayed Structures in the Construction Sequence of Bridges Built by Cantilevering <i>Antonino Recupero, Giuseppe Longo, Michele Fabio Granata</i>	71-96
Influence of Cable Failure Mechanisms on the Dynamic Behavior of Cable Stayed Bridges <i>Domenico Bruno, Fabrizio Greco, Paolo Lonetti</i>	97-115
Dynamics of an Arch Bridge Under Moving Loads - A mathematical model <i>Ioannis G. Raftoyiannis, George T. Michaltsos</i>	117-134
Shake Table Studies of a Precast Bridge Pier with Advanced Materials <i>Sarira Motaref, M. Saiid Saiidi, David Sanders, Amir Mirmiran</i>	135-162
Seismic Wave Effects on the Dynamic Response of Bridge Foundations <i>Roberto Cairo, Giovanni Dente, Stefano Dodaro</i>	163-184
Composite Steel Concrete Bridges Using Sinusoidal Corrugated Steel Web Beams <i>Marcello Cammarata, Giovanni Minafò, Nunzio Scibilia</i>	185-196
Bridge Subjected to Surface Fault Rupture Part I: Numerical Investigation <i>Antonios Kladis, Fani Gelagoti, Marianna Loli, George Gazetas</i>	197-219
Modeling Wind Loads on Long-Span Bridges <i>Giuseppe Vairo</i>	221-259
