

CONTENTS

Seismic performance of hollow-core composite bridge columns <i>Omar I. Abdelkarim, Mohamed A. ElGawady</i>	1-24
Precast piers with grouted splice sleeve connections for accelerated bridge construction in seismic zones <i>M. J. Ameli, Chris P. Pantelides</i>	25-52
Ductility without confinement - A new design and construction approach for RC bridge columns <i>Abdullah Boudaqa, Mostafa Tazarv, Ishtiaque Tuhin</i>	53-77
Design of isolated bridges for multi-level seismic performance using gapped device connections <i>Murat Dicleli, Ali Salem Milani</i>	79-97
Seismic design of precast piers with pocket connections, CFRP tendons and ECC/UHPC columns <i>Alireza Mohebbi, M. Saiid Saiidi, Ahmad M. Itani</i>	99-123
Revised design methodology for integral bent caps in reinforced concrete bridges <i>Mohamed A. Moustafa, Khalid M. Mosalam</i>	125-149
Design concept and verification of temporary rescue bridge using lightweight composite materials <i>Yu-Chi Sung, Fang-Yao Yeh, Kuo-Chun Chang</i>	151-170
Seismic repair design of RC bridge columns damaged under combined bending and torsion effects <i>Yang Yang, Ruili He, Lesley Sneed</i>	171-189
