

CONTENTS

Composite bridges: study of parameters to optimized design <i>Ricardo Fabean, Moacir Kripka, Zacarias M. Chamberlain Pravia</i>	1-20
Effect of overhang deck construction on plate girder bridges <i>Md Ashiquzzaman, Bora Bozkurt, Li Hui, Ahmed Ibrahim, Will Lindquist, Riyadh Hindi</i>	21-33
Simulation of advanced 3D finite element dynamic vehicle bridge interaction using single and multi-vehicle scenario for obtaining dynamic amplification factor <i>Rahul Kalyankar, Nasim Uddin</i>	35-55
Case study: investigating the failure of Khani post-tensioned concrete box girder bridge in Zakho – Iraqi Kurdistan <i>Razaq Ferhadi, Honar Issa</i>	57-80
Comparison between the behaviour of the different shapes of pylon in the linear static analysis of cable stayed bridge using SAP2000 <i>Hussain Hararwala, Savita Maru</i>	81-102
Mechanical properties of composite laminated decks plates <i>Osama Mohammed Elmardi Suleiman Khayal</i>	103-111
Analysis and retrofitting of arch bridges - A review <i>Rohit Kumar Mittal, Krishna Sai Vutukuru</i>	113-138
Trail bridges in Nepal: Bridges to prosperity (TECHNICAL NOTE) <i>Niraj Sapkota</i>	139-147
